

**DUCT STRUCTURE FOR LOW NOISE AIR CONDITIONING**

Patent number: JP6156054  
Publication date: 1994-06-03  
Inventor: FUKUSHIMA SHIGEYOSHI; MIMURA SHIGETOSHI  
Applicant: TOYO TIRE & RUBBER CO  
Classification:  
- International: B60H1/00; B60H1/26; F24F13/02  
- european:  
Application number: JP19920335619 19921119  
Priority number(s): JP19920335619 19921119

**Abstract of JP6156054**

**PURPOSE:** To decrease noise after satisfying the condition as a duct that necessary air does not leak, by providing an opening at least at a part of a duct body and mounting and mounting in one body with the duct a soft urethane foam sheet material, in which film is laminated on its one side. **CONSTITUTION:** A soft urethane foam sheet material 3, in which film 8 is laminated on one side, is mounted in form of one body with the duct via an adhesive or pressure sensitive adhesive, to the opening of a duct body 2, which is formed by blow-molding or injection molding-polyethylene resin or polypropylene resin and thus the duct structure is produced. This duct structure is used by being attached to an air conditioner unit for an automobile.
